# Make the day-to-day running of your care home more efficient, whilst also driving improvement

Is your organisation ready to delve into digital ways of working?

## Radar Healthcare can help!

Our award-winning software allows you to simplify the complexity of quality, risk and compliance within your care home. Radar Healthcare fits to your processes and procedures, and our modules are totally flexible, so you only pay for what you need. Our easy-to-use software provides you with one central source of truth, whilst also helping to deliver improved care outcomes.

### Product Modules

Incident Management

Action and Improvement plans

Risk Management

Analytics and Reporting

Audit Management

Workforce Compliance

Document Management

Business Compliance

## How does Radar Healthcare help you?

### As a carer

Radar Healthcare provides a standardised approach to quality and compliance. As well as providing access to all processes and procedures, itemised task lists ensure everyone understands what is required of them. Easy to follow process flows also make data management simple for your teams.

### As a manager

Radar Healthcare helps instill a culture of accountability and responsibility, meaning you have confidence that the right actions are completed at the right time. Real-time dashboards and reporting provide the performance and service data you need at a click of a button. Service management is simpler with smart KPIs driven by artificial intelligence. You can also easily collate Provider Information Requests (PIRs) for regulators on demand.

## Your journey with Radar Healthcare

We know that choosing and implementing a new piece of software can sometimes be a bit daunting. Here at Radar Healthcare we do everything we can to ensure that your journey to becoming a customer with us is a smooth one. From your first conversation with one of our Business Development Managers to your onboarding process with your dedicated Project Manager and ongoing support from your Customer Success Manager, we'll be there to support you every step of the way.

"Moving from an 'Inadequate' to a 'Good' CQC rating in such a short period of time is a significant achievement and the implementation of Radar Healthcare has been instrumental in this. We have an overall picture of the quality of care we are delivering; we can see where things are going wrong but more importantly, we have access to data and information which helps us prevent things from going wrong in the first place.

It has provided the team and the CQC with confidence that we now have the systems in place to deliver the highest standard of care."

Craig Priestley, Manager at Gorse Clough

Improved CQC ratings

Standardised best practice service delivery

Real time visibility of performance

Evidence of service excellence and continuous improvement

Instill a culture of accountability and responsibility, ensuring that nothing is overlooked

Manage risk controls such as ownership of risk, visibility, costs and more

Digitisation of manual processes to deliver operational efficiencies

Our software has been developed in partnership with healthcare professionals to ensure organisations always meet regulatory standards through one single, easy to use system.

Working with organisations across all areas of health and social care, we're passionate about improving healthcare outcomes through intuitive and innovative software.

## Our customers include:

"Radar Healthcare saves us a huge amount of time reviewing and analysing quality and compliance data for events such as accidents and incidents or clinical data around wounds and medication errors. It would typically have taken two to three days per month for us work through all the data for each care home with information spread across ~300 emails but we can now gather and analyse all that data in less than a day which has allowed more time for us to focus on service support and the delivery of care; directly translating into significant cost savings across the group."

Scott Finnigan, General Manager of Thistle Healthcare Group
