SUPPORTING BUSY PRIMARY CARE TEAMS TO DELIVER IMPROVED PATIENT OUTCOMES

Radar Healthcare's integrated risk management system has been developed to help busy teams like yours work more efficiently.

Our software enables you to seamlessly move from manual paper-based processes to digital ways of working, reducing the risk of human error and allowing you to ultimately improve safety. Enjoy connected working by removing disparate systems and bringing together different locations and teams into one place. This reveals insights anytime you need them, which you can share, helping you work towards improved patient outcomes together.

We know that much of your time is spent balancing day-to-day tasks with longer term priorities.

Let our simple-to-use software give you and your team back the time and headspace you need to deliver excellent care.

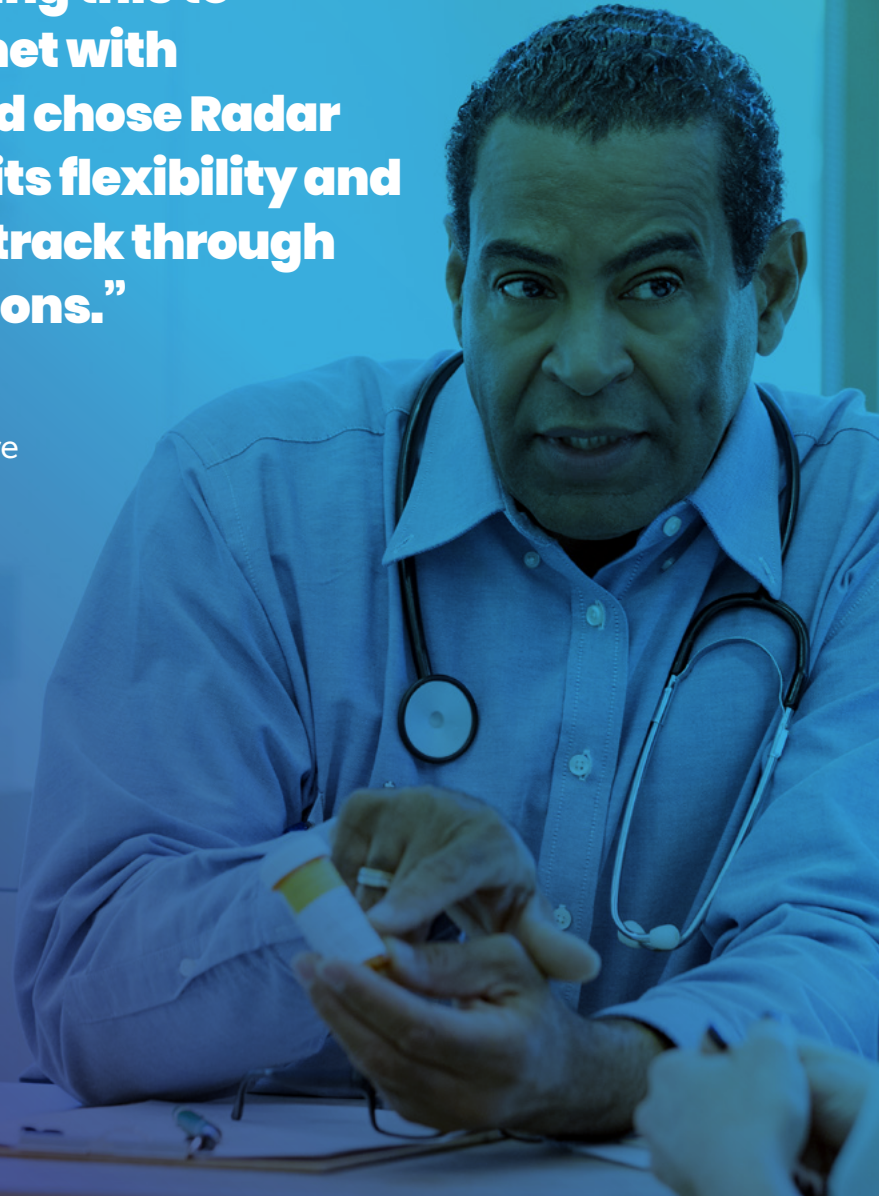

BENEFITS

- ✓ Work more efficiently
- ✓ Improve communication and collaboration
- ✓ Be ready for regulatory inspection
- ✓ Improve policy compliance
- ✓ Manage complaints and incidents effectively
- ✓ Easily share learning across teams

“With Radar Healthcare, we are able to better demonstrate to our customers how we manage and track issues. This system has been very useful in demonstrating this to the CQC as well. We met with several providers, and chose Radar Healthcare based on its flexibility and its ability to robustly track through issues, tasks and actions.”

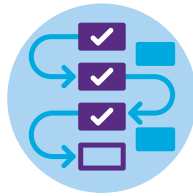

Richard Shama
Medical Director at Omnes Healthcare

RADAR HEALTHCARE: OUR PEOPLE, OUR CULTURE

Commitment to our partners means you can be confident you're choosing someone you can trust and rely on. Ultimately, we're here to help healthcare providers like you deliver safer, better healthcare.

Every process we have is defined to ensure engagement at a user level and the intuitive nature of our software is fundamental to success.

Our collaboration process is one of the key elements of partnership working and partnership is everything to us.

So what makes us different?

- ✓ Our software is uniquely flexible, providing the functionality you need today, while future-proofing your organisation for tomorrow
- ✓ We work in collaboration with you to understand your objectives
- ✓ We build relationships to help you to achieve your goals
- ✓ Our consultative team are here to help you with every step of your digital transformation process

"We really like the level of support for ongoing system developments and the fact that we can tailor requirements to our business objectives. The team at Radar Healthcare make us feel more like partners than customers, as they're helping drive our business forward."

Amanda Allen, Quality and CQC Consultant at Optegra Eye Health Care

**“Radar Healthcare
has given assurance
that we wouldn’t
have otherwise; an
overarching view of
all services without
even needing to
leave the door.”**

Founded in 2012 by Paul Johnson and Lee Williams,
Radar Healthcare is dedicated to making healthcare safer.

Our software has been developed in partnership with
healthcare professionals to ensure organisations always meet
regulatory standards through one single, easy-to-use system.

Working with organisations across all areas of health and
social care, we're passionate about improving healthcare
outcomes through intuitive and innovative software.

Over 10,000 locations are already seeing the benefits of Radar Healthcare, including:

London Central & West
Unscheduled Care Collaborative
